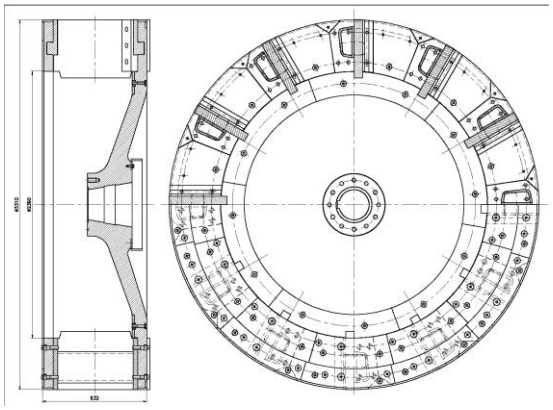
COAL PULVERIZING SYSTEMS



Activities:

- Basic and Detail Design
- Manufacturing and Delivery
- Erection supervision
- Commissioning
- Adjustments and tests

Projects:

- Basic and Detail design of Mills modification and new adjustable classifiers; manufacturing of the classifiers, commissioning, adjustment and tests for 3x100 t/h Boilers burning lignite – Timisoara South TEP
- Basic and Detail design of modification of the Mills and classifiers; manufacturing of the components, erection supervision, commissioning, adjustments and tests for 4x227 MW Boilers burning high ballast lignite – Enel Maritsa East 3 TPP

Aim of the project:

✓ Increasing of the Boiler power

- Basic and Detail design of new Fan mills with classifiers; manufacturing of the classifiers, erection supervision, commissioning, adjustments and tests for 4x350 MW Boilers burning subbituminous coal – As Pontes TPP
